

TeamSync — Domain Model

Conceptual & Database Entity-Relationship Schema
Author: Rajkumar PR

1. Overview

This diagram presents the conceptual domain model for TeamSync, illustrating how the core entities — User, Project, and Task — relate to one another along with their supporting audit and collaboration entities: DeadlineHistory, TaskComment, TaskActivity, and TaskAttachment. Each relationship is annotated with its cardinality (one-to-many) and the role it represents within the system.

2. Entity-Relationship Diagram

3. Relationship Legend

Relationship	Cardinality	Description
User → Project	1 : N	A user creates or joins one or more projects
User → Task	1 : N	A user creates and/or is assigned to tasks
