

TeamSync — Installation & Setup Guide

Full-Stack Team Project & Task Management Application | Author: Rajkumar PR

1. Executive Overview

TeamSync is an enterprise-grade project and task management application designed for agile development teams. Built with Django 5 (Python) and Next.js 15 (TypeScript), it features full RBAC security (Admin vs Team Member), project join invitation workflows, 1-click task completion toggles, custom toast alert notifications, and historical deadline revision logging.

2. Prerequisites & Technology Requirements

Component	Required Version	Purpose
Python	v3.10+	Backend Django REST API Server
Node.js	v18.0+	Frontend Next.js App Router
Git	Latest	Version Control & Releases
Docker (Optional)	v24+	Containerized Full-Stack Execution

3. Local Step-by-Step Installation Instructions

Step 3.1: Repository Clone

```
git clone https://github.com/RajkumarPadmanabhan/TeamSync.git
cd TeamSync
```

Step 3.2: Backend Django Setup

```
cd backend
python -m venv ..\venv
..\venv\Scripts\Activate.ps1 # (Windows PowerShell)
pip install -r requirements.txt
python manage.py migrate
python manage.py seed_data
python manage.py runserver 8000
```

Step 3.3: Frontend Next.js Setup

```
cd ../frontend
npm install
npm run dev
```

Frontend dashboard accessible at **http://localhost:3000/**

4. Pre-Configured Test User Credentials

Role	Username	Password	Email	Department
■ ADMIN	admin	admin123	admin@teamsync.com	Engineering
■ MEMBER	alice	alice123	alice@teamsync.com	Frontend Dev
■ MEMBER	bob	bob123	bob@teamsync.com	Backend Dev
■ MEMBER	david	david123	david@teamsync.com	Security
